**DETAILED ACTION**  
**REASON FOR ALLOWANCE**

Claims 1, 3-5, 7-14, 18-26 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a DVD player for reading a still picture file and transcoding data from still picture file.

The independent claims 1, 5, 18, 23, and 26 are identifies the uniquely distinct feature for "wherein the sequence of frames includes the key picture frame and dummy frames that indicate zero difference between the key picture frame and the dummy frames"

**Takahashi, US 6,424,795**, discloses recording still pictures, the video recording apparatus records still pictures encoded by the still picture encoding means (106) and other still pictures encoded by the moving picture encoding means (105) from single frame signals. The single frame signals are created by the signal converting means (109) from the still pictures encoded by the still picture encoding means (106).

**Parulski, US 6,310,647**, discloses an image format for storing digital images within a baseline DCT compatible bitstream comprises entropy coded image data, a first application marker storing a first data value using a first encoding method to convey a first information value related to the image, and a second application marker storing a second data value using a second encoding method to convey the same said first information value related to the image. More specifically, the first application marker

uses TIFF tags within an Exif application marker and the second application marker uses a FlashPix compatible structured storage stream, while the entropy coded data includes restart markers to define tile boundaries within the entropy coded image data.

**Nonomura, US 6,907,188**, discloses an optical disk includes an audio data storage area for storing audio data; a still picture data storage area for storing a plurality of pieces of still picture data; and a management area for storing reproduction control information for controlling reproduction of the audio data and the plurality of pieces of still picture data. The reproduction control information has flag information representing specified still picture data among the plurality of pieces of still picture data.

None of the prior art, either singularly or in combination, fails to anticipate or render the above underlined limitations obvious. Claims 3-4,7-14, 19-22, and 24-25 are dependent on claims 1, 5, 18, 23, and 26 and therefore dependent claims also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
